"JUNIOR MOVIEGRAPHS" 8 M.M.

REG. U. S. PAT. OFFICE

KEYSTONE IS THE FIRST TO MARKET 8 M.M. JUVENILE PROJECTORS

8 M.M.

A substantial saving in the cost of film — 50 feet of 8 M.M. film will give a show equivalent to 100 feet of 16 M.M. film — an additional saving of about half of the cost of 16 M.M. in the price of the film itself. While the picture area of the 8 M.M. film is not quite as bright as the 16 M.M. — the difference in the cost of film makes the use of 8 M.M. equipment worthwhile to many users.

8 M.M.

**MODEL E-885 — 8 M.M. —
Hand Crank—75-watt Lamp
— Two 100-foot Reels.**

KEYSTONE "8" mm
COLOR MOVIES
Start now to keep a living, full color record of the growth of the children. Take a moving picture of them every few months. The Keystone "8" with an F3.5 Wollensak lens is a precision built instrument of remarkable optical powers. This internationally famous movie camera makes pictures with perfect clarity and infinite detail in black and white or full color, using either Eastman or Economy Agfa film. Sight through the finder, press the button, and your job as operator is done. The film is developed free of charge and returned to you prepaid. Pictures may be taken in three speeds, normal, low or slow motion. Keystone Mfg. Co. makes a complete range of moving picture cameras and projectors in both the 8 and 16 mm. Whether you choose the least expensive 8 mm. or the larger 16 mm. camera, there is no difference in precision workmanship, and all are light weight and smooth running. See your nearest Keystone dealer or write to us for complete information.
